OFFBOARD® VERMIN SHIELDS TO PROTECT THE MIDWAY AIRCRAFT CARRIER

Foothills Products, Inc. has been notified that the San Diego Aircraft Carrier Museum in San Diego has selected the OFFBOARD® Vermin Shields to protect the Midway Aircraft Carrier moored at berth in San Diego.

Shields, when placed on the mooring lines, provide an effective restriction to vermin attempting to gain access.

The OFFBOARD® Vermin Shields are designed for multiple uses. They can be used when moored in a slip, or beached at remote locations. Retail prices range from \$26.95 to \$59.95 for various sizes. www.offboard.com

Made in the Denver metro area, the patented shields are durable plastic with stainless steel components. The OFFBOARD® Shields are easy to use and built to last, solving a significant problem for us reports Vic Zambrano, Facilities Director at the Museum. Mooring lines are gangplanks for vermin to gain access to the Midway. Art and Sharon Onweller, founders of Foothills Products, Inc., recognized that vermin access via mooring lines were a leading source of food contamination, damage to electrical wiring and can potentially spread disease. Their product, OFFBoard® Vermin

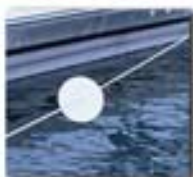

**The USS Midway uses
Offboard Shields ... because
it wanted the best.**
